

Ankur Desai

(248) 657 – 3805 | ardusa05@gmail.com | www.ardusa.dev | linkedin.com/in/ardusa

EDUCATION

Michigan State University

B.S. in Computer Science

Expected Graduation, 2027

East Lansing, MI

- **GPA:** 3.5 / 4.0
- **Relevant Coursework:** Linear Algebra, Discrete Mathematics, Object-Oriented Software Design, Computer Organization and Architecture, Data Structures & Algorithms

EXPERIENCE

MindMosaic

Software Engineer

Aug. 2025 – Nov. 2025

East Lansing, MI

- Built Spring Boot backend and Angular frontend; introduced Neo4j to offload recursive relational queries from PostgreSQL, cutting p95 latency 48% (850ms → 440ms).
- Refactored Cypher with relationship-type indexing; traversals 3× faster than SQL self-joins, removing full-table scans.
- Integrated dual-provider OAuth 2.0 (Google + GitHub) with httpOnly JWT cookies and user-scoped graph access control.
- Implemented GitLab CI/CD for Spring Boot services: build, test, containerized deploy, branch-protected merges, 85% coverage across 35+ automated tests.

Claude Builder Club @ MSU

Vice President

Oct. 2025 – Present

East Lansing, MI

- Eliminated manual onboarding by automating provisioning (GitHub API + Slack SDK), granting repo and workspace access in 30s, cutting setup time 97% across 100+ members.
- Replaced paper sign-in with QR-driven check-in backed by AWS S3 token caching, cutting processing time 80%.
- Enforced production quality via GitHub Actions CI/CD with 90% coverage gates and 20+ automated tests.

PROJECTS

Mira — Agentic Voice Assistant | *Next.js, FastAPI, MongoDB, Redis, Celery* May 2025 – Nov. 2025

- Engineered multi-client agentic voice assistant that resolves implicit speaker intent and dispatches real tasks across concurrent voice streams.
- Reduced RESTful API response time 73% by offloading RAG pipeline to async Redis/Celery task queue (microservices-style decoupling).
- Built Next.js + Electron client with OAuth callback interception and real-time IPC; webhook server for sub-50ms event propagation.
- Deployed FastAPI on AWS Lambda with lazy-loaded ML models (Whisper, Sentence-BERT, spaCy), reducing cold-start 86% (6,643ms → 930ms).

WizViz — SpartaHack X | *Python, MediaPipe, OpenCV, NumPy, TensorFlow*

Feb. 2025

- Won Interactive Media Track: gesture-controlled wizard duel; full-body movements cast spells and trigger abilities against an AI opponent.
- Built gesture pipeline with MediaPipe Pose (33 landmarks → game actions); optimized inference to 60 FPS, sub-20ms input lag.

TECHNICAL SKILLS

Languages Python, Java, JavaScript/TypeScript, SQL, Cypher, Golang, C++, Bash
Frameworks Spring Boot, FastAPI, Node.js, Angular, React, Next.js, Vue, Redis, HTML, CSS
Databases PostgreSQL, MySQL, Neo4j, MongoDB
Cloud & Infrastructure AWS (EC2, RDS, S3), Docker, Kubernetes, GitLab CI/CD, DevOps
