EDUCATION

Michigan State University

B.S. in Computer Science

Expected May 2027

East Lansing, MI

- **GPA:** 3.5 / 4.0
- **Relevant Coursework:** Linear Algebra, Discrete Mathematics, Object-Oriented Software Design, Computer Organization and Architecture, Data Structures & Algorithms

EXPERIENCE

Claude Builder Club @ MSU

Co-Founder & Vice President

Oct 2025 – Present

East Lansing, MI

- Cut member setup time 97% for 100+ MSU students by replacing paper onboarding packets with a 30-second digital intake flow that updates roster and access records in one pass—eliminating multi-day back-and-forth while keeping administrative data consistent across systems.
- Retired paper sign-in for large on-campus events with a QR check-in workflow backed by cached digital tokens—handles 150+ scans per major event with customer-service-friendly validation at the door; caching cut redundant verification calls about 60% and reduced end-to-end processing time roughly 80% versus manual tallying.
- Produced dependable daily and per-event operational reports by cross-checking attendance records against enrollment on a fixed schedule—runs still complete when a row needs manual follow-up instead of halting the whole batch.
- Maintained authoritative membership records in database software (PostgreSQL) using role-based rules for a four-tier hierarchy (prospect → member → board → e-board), preventing conflicting access during meetings and releases.
- Tightened release quality for member-facing services with GitHub Actions gates (90%+ coverage targets, 60+ automated tests, branch-protected merges), cutting bug escape rate about 65% compared with prior ad hoc releases.

WFS Consulting Group

Web Development Intern

May – Aug 2025

Plymouth, MI

- Delivered the firm's customer-facing website in Vue as administrative support for a non-technical manager—translating Figma specs into exact layout details on tight feedback cycles and hardening contact forms with validation to reduce incomplete submissions.
- Shipped responsive layouts in Vue.js across the public site so customers on phones and desktops saw consistent spacing, typography, and navigation against the approved design baseline.

PROJECTS

MindMosaic — Knowledge Graph Explorer | *Spring Boot, Neo4j, PostgreSQL*

Aug – Nov 2025

- Built structured record keeping for interconnected ideas—search, filter, and visual navigation—so users can return to complex graphs without losing context as data grows.
- Implemented dual-database persistence in production-grade database software (PostgreSQL + Neo4j) with relationship indexing that cut lookup latency 48% (850ms → 440ms) versus the prior SQL approach, improving reliability of deep-link pulls across large graphs.
- Coordinated a six-engineer effort with sprint planning, merge review, and release checklists—kept ownership of tasks and contributor expectations clear as scope shifted week to week.
- Integrated dual-provider sign-in (Google + GitHub) with rotating session credentials and strict, user-scoped access—each account retrieves only its own saved graph records.

WizViz — SpartaHack X | *Python, MediaPipe, OpenCV, TensorFlow*

Devpost

- Won SpartaHack X; built a cooperative, gesture-controlled game under a hackathon deadline—owned on-floor demos, rapid integration fixes, and packaging for judges.

TECHNICAL SKILLS

Office spreadsheet software (Excel), word processing (Word), Google Sheets/Docs, PC/printers/scanners

Languages Python, Java, JavaScript/TypeScript, SQL, C/C++, Bash

Frameworks React, Vue.js, Spring Boot, FastAPI, Node.js, Tailwind CSS

Databases PostgreSQL, Neo4j, Redis, MySQL

Cloud & Tools AWS (S3, CloudFront), Docker, GitHub Actions
