

Ankur Desai

(248) 657 – 3805 | ardusa05@gmail.com | ardusa.github.io | linkedin.com/in/ardusa

EDUCATION

Michigan State University

B.S. in Computer Science

Expected Graduation, 2027

East Lansing, MI

- **GPA:** 3.5 / 4.0
- **Relevant Coursework:** Linear Algebra, Discrete Mathematics, Object-Oriented Software Design, Computer Organization and Architecture, Data Structures & Algorithms

EXPERIENCE

Claude Builder Club @ MSU

Vice President

Oct. 2025 – Present

East Lansing, MI

- Eliminated manual onboarding entirely by automating member provisioning (GitHub API + Slack SDK) to grant full repo and workspace access in 30 seconds, cutting setup time 97% across 100+ members in a cross-functional student org.
- Enforced production-grade quality via GitHub Actions CI/CD with 90% coverage gates across 20+ tests; contributed maintainable code and participated in version control and review practices.

MindMosaic

Software Engineer

Aug. 2025 – Nov. 2025

East Lansing, MI

- Introduced Neo4j to offload recursive relational queries from PostgreSQL, cutting p95 latency 48% (850ms → 440ms) and eliminating SQL join overhead for multi-hop traversals.
- Refactored Cypher with relationship-type indexing; indexed traversals ran 3× faster than equivalent SQL self-joins and removed full-table scans on relationship lookups.
- Integrated dual-provider OAuth 2.0 (Google + GitHub) with httpOnly JWT cookies, refresh token rotation, and user-scoped graph access control.

PROJECTS

Mira — Agentic Voice Assistant | *React, Next.js, FastAPI, MongoDB, Redis, Celery* May 2025 – Nov. 2025

- Engineered multi-client agentic voice assistant that batches natural dialogue, resolves implicit speaker intent, and dispatches real tasks across concurrent voice streams.
- Built responsive, accessible, component-based Electron + Next.js (React) client with an embedded HTTP server for OAuth callback interception; real-time events via IPC and a dedicated webhook server deliver sub-50ms propagation.
- Reduced RESTful API response time by 73% by offloading RAG pipeline to async Redis/Celery task queue; built React front-end with component state (hooks) and integrated with backend services via RESTful APIs and JSON; used Git and AI-assisted development (e.g., Claude) for UI and API iteration.
- Deployed FastAPI inference service on AWS Lambda with lazy-loaded ML models (Whisper, Sentence-BERT, spaCy), eliminating idle compute costs while reducing cold-start latency by 86% (6,643ms → 930ms).

WizViz — SpartaHack X | *Python, MediaPipe, OpenCV, NumPy, TensorFlow*

Feb. 2025

- Won Interactive Media Track: Gesture-controlled wizard duel where full-body movements cast spells, block attacks, and trigger abilities against an AI opponent.
- Built full-body gesture pipeline using MediaPipe Pose to map 33 skeletal landmarks into game actions; optimized inference loop to sustain 60 FPS with sub-20ms input lag.

TECHNICAL SKILLS

Languages Python, Java, JavaScript/TypeScript, HTML, CSS, SQL, Cypher, Golang, C++, Bash

Frameworks & Web React, Next.js, Node.js, SASS, Spring Boot, FastAPI, Angular, Redis

Databases PostgreSQL, Neo4j, MongoDB

Tools & Infrastructure Git, npm, AWS (EC2, RDS, S3), Docker, GitLab CI/CD, REST APIs
