

Ankur Desai

(248) 657 – 3805 | ardusa05@gmail.com | ardusa.github.io | linkedin.com/in/ardusa

EDUCATION

Michigan State University

B.S. in Computer Science

Expected Graduation, 2027

East Lansing, MI

- **GPA:** 3.5 / 4.0
- **Relevant Coursework:** Linear Algebra, Discrete Mathematics, Object-Oriented Software Design, Computer Organization and Architecture, Data Structures & Algorithms

EXPERIENCE

Claude Builder Club @ MSU

Vice President

Oct. 2025 – Present

East Lansing, MI

- Eliminated manual onboarding entirely by automating member provisioning (GitHub API + Slack SDK) to grant full repo and workspace access in 30 seconds, cutting setup time 97% across 100+ members.
- Replaced paper sign-in sheets with a QR-driven check-in system backed by AWS S3 token caching, enabling real-time attendance tracking and cutting processing time by 80%.
- Enforced code quality and maintainability via automated test suites achieving 90% coverage across 20+ tests, gated behind GitHub Actions CI/CD with branch-protected deployments.

MindMosaic

Software Engineer

Aug. 2025 – Nov. 2025

East Lansing, MI

- Diagnosed recursive SQL join bottlenecks via query profiling and introduced Neo4j to offload multi-hop graph traversals from PostgreSQL, cutting p95 latency 48% (850ms → 440ms).
- Refactored Cypher with relationship-type indexing; indexed traversals ran 3× faster than equivalent SQL self-joins and removed full-table scans on relationship lookups.
- Secured authentication layer with dual-provider OAuth 2.0 (Google + GitHub), implementing httpOnly JWT cookies, refresh token rotation, and user-scoped graph access control.
- Implemented GitLab CI/CD pipeline covering the full software development lifecycle — automated build, test, and containerized deployment stages — with branch-protected merges enforcing 85% coverage across 35+ tests.

PROJECTS

Mira — Agentic Voice Assistant | *Next.js, FastAPI, MongoDB, Redis, Celery* May 2025 – Nov. 2025

- Engineered multi-client agentic voice assistant that batches natural dialogue, resolves implicit speaker intent, and dispatches real tasks across concurrent voice streams.
- Reduced RESTful API response time by 73% by offloading RAG pipeline to async Redis/Celery task queue.
- Deployed FastAPI inference service on AWS Lambda with lazy-loaded ML models (Whisper, Sentence-BERT, spaCy), eliminating idle compute costs while reducing cold-start latency by 86% (6,643ms → 930ms).

WizViz — SpartaHack X | *Python, MediaPipe, OpenCV, NumPy, TensorFlow* Feb. 2025

- Engineered real-time gesture recognition system (SpartaHack X, 1st place — Interactive Media) where full-body skeletal movements drive live game actions against an AI opponent with sub-20ms input lag.
- Built full-body gesture pipeline using MediaPipe Pose to map 33 skeletal landmarks into game actions; optimized inference loop to sustain 60 FPS with sub-20ms input lag.
- Developed custom 2D vector physics engine with AABB collision detection to accurately translate live 3D skeletal coordinates to game state, maintaining <5px drift at 60 FPS.

TECHNICAL SKILLS

Languages Python, Java, JavaScript/TypeScript, SQL, Cypher, Golang, C++, Bash

Frameworks Spring Boot, FastAPI, Node.js, Angular, React, Next.js, Redis

Databases PostgreSQL, Neo4j, MongoDB

Cloud & Infrastructure AWS (EC2, RDS, S3), Docker, GitLab CI/CD, CI/CD Pipelines
