Hiring Committee

International Studies & Programs

Michigan State University

East Lansing, MI

**Re: Website Intern (part-time, hybrid — apply by April 23, 2026)**

Dear ISP hiring team,

I am writing to apply for the Website Intern position supporting ISP’s web team through your **website redesign and migration**. I am a **B.S. Computer Science** student at Michigan State University (expected **May 2027**), already on campus in East Lansing, and I want work where **accuracy, accessibility, and calm quality assurance** matter as much as shipping features.

In my **Web Development Intern** role at WFS Consulting Group, I shipped the firm’s main **customer-facing site in Vue**, working from **Figma** through iterative review with a non-technical stakeholder so **published web content** matched signed-off layouts on desktop and mobile. I paid deliberate attention to **forms and error states**—labels, keyboard paths, and clear messaging—because those are the first places “small” web problems become real user failures. Separately, on **MindMosaic**, I helped move performance-critical reads through a **migration** off recursive SQL onto **Neo4j** while keeping **automated quality-assurance gates** in CI; the stack differs from a CMS, but the habits—checklists, regressions, and not breaking production readers—carry directly to **content migration** and **QA passes** on new pages.

I am excited about **International Studies & Programs** because your audience depends on trustworthy, inclusive digital information. I am **ready to learn your CMS (WordPress, Drupal, Sitecore, or whatever ISP standardizes on)** through the training you provide, and I will supplement that with **WCAG-oriented** reading and checklists so accessibility is not an afterthought. I already maintain public samples you can review: <https://dadei.app> (live product, React/Vite) and <https://ardusa.dev> (personal site); both demonstrate how I think about **user experience** across devices and deployments.

I am a **U.S. citizen** with unrestricted work authorization, comfortable in **weekly staff and cross-functional meetings**, and I can commit to **summer 2026** with openness through **fall 2026** if that remains helpful to the migration schedule.

Thank you for your consideration.

Sincerely,

Ankur Desai
