

Ankur Desai

(248) 657 – 3805 | ardusa05@gmail.com | ardusa.github.io | linkedin.com/in/ardusa

EDUCATION

Michigan State University

B.S. in Computer Science

Expected, May 2028

East Lansing, MI

- **GPA:** 3.5 / 4.0
- **Relevant Coursework:** Linear Algebra, Discrete Mathematics, Object-Oriented Software Design, Computer Organization and Architecture, Data Structures & Algorithms

EXPERIENCE

Claude Builder Club @ MSU

Vice President & Co-Founder

Oct. 2025 – Present

East Lansing, MI

- Eliminated manual onboarding entirely by automating member provisioning (GitHub API + Slack SDK) to grant full repo and workspace access in 30 seconds, cutting setup time 97% across 50+ members.
- Replaced paper sign-in sheets with a QR-driven check-in system backed by AWS S3 token caching, enabling real-time attendance tracking and cutting processing time by 80%.
- Enforced production-grade quality via GitHub Actions CI/CD with 90% coverage gates across 30+ tests, reducing bug escape rate by 65%.

MindMosaic

Software Engineer

Aug. 2025 – Nov. 2025

East Lansing, MI

- Built full-stack knowledge graph application where users map how ideas connect, not just store them.
- Designed polyglot persistence layer (PostgreSQL + Neo4j) where relational data anchors facts and graph traversals reveal connections; recursive relationship queries ran 3× faster than equivalent SQL joins.
- Eliminated slow graph queries as a bottleneck by refactoring Cypher queries with relationship-type indexing, cutting p95 latency 48% (850ms → 440ms).
- Maintained 85% test coverage across JUnit and Jasmine suites via GitHub Actions CI/CD with branch protection on all production merges.

PROJECTS

Mira — Distributed AI Assistant | *Next.js, FastAPI, MongoDB, Redis, Celery* May 2025 – Nov. 2025

- Engineered multi-client ambient AI that batches natural dialogue, resolves implicit speaker intent, and dispatches real tasks across concurrent voice streams.
- Sped up API response time by 73% by offloading RAG pipeline to asynchronous Redis/Celery task queue.
- Built bidirectional Electron + Next.js client synchronizing real-time events via IPC channels and a dedicated webhook server, delivering sub-50ms event propagation latency and speaker transcriptions in under 2 seconds.
- Deployed FastAPI inference service on AWS Lambda with lazy-loaded ML models (Whisper, Sentence-BERT, spaCy), eliminating idle compute costs while reducing cold-start latency by 86% (6,643ms → 930ms).

WizViz — SpartaHack X | *Python, MediaPipe, OpenCV, NumPy, TensorFlow*

Feb. 2025

- Won Interactive Media Track: Gesture-controlled wizard duel where full-body movements cast spells, block attacks, and trigger abilities against an AI opponent
- Built full-body gesture pipeline using MediaPipe Pose to map 33 skeletal landmarks into game actions; optimized inference loop to sustain 60 FPS with sub-20ms input lag.
- Developed custom 2D vector physics engine with AABB collision detection to accurately translate live 3D skeletal coordinates to game state, maintaining <5px drift at 60 FPS.

TECHNICAL SKILLS

Languages Python, Java, JavaScript/TypeScript, SQL, Cypher, Bash

Frameworks Spring Boot, FastAPI, Node.js, Angular, React, Tailwind CSS, Next.js, Redis

Databases PostgreSQL, Neo4j, MongoDB

Cloud & Infrastructure AWS (EC2, RDS, S3), Docker, GitHub Actions
